

Viruses in Forest and Urban Trees and Shrubs

Guest Editors:

Dr. Susanne von Bargan

Prof. Dr. Carmen Büttner

Dr. Thierry Candresse

Dr. Risto Jalkanen

Prof. Dr. Sebastien Massart

Dr. Tod Ramsfield

Message from the Guest Editors

We welcome articles that deal with the identification and the characterization of known and novel viruses (single or as a virome) affecting woody host species. Suitable diagnostic tools for detection of plant viruses infecting these hosts can also be reported. Emphasis is given to viruses and virus complexes that affect host species which are important in forestry or urban greens, but virus diseases and disease complexes of trees and shrub species in general will also be considered.

Keywords

- plant viruses
- deciduous trees
- conifers
- virome
- pathobiome
- detection
- epidemiology
- viral genome
- viroids
- mycoviruses
- virus-host interaction
- metabolic impact
- management

Message from the Editorial Board

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank: JCR - Q1 (Forestry) / CiteScore - Q1 (Forestry)
