Message from the Guest Editor

Wood-based products, their trade, and consumption play an ever-increasing role in the emerging global bioeconomy. Forests and their products actively contribute to achieving the long-term goals set out in the Paris Agreement as well as the Sustainable Development Goals of the United Nations. The trade of wood products is affected by numerous policies directly targeting the forest sector. Notably, concern regarding unsustainable forest practices has led to policy initiatives—targeting producer (exporting) and/or consumer (importing) countries—designed to strengthen sustainable and legal forest management by promoting the trade of legally produced timber and discouraging illegal timber trades. Prominent among these policies are climate and energy policy initiatives. This Special Issue intends to further the understanding of the interplay between policy and wood-based products as well as their trade and consumption. Themes that could be addressed include structural changes in wood-based product markets, emerging products, substitution, trade diversion, and carbon leakage. The scope of this Special Issue encompasses global, regional, national, and sub-national levels.

Editors-in-Chief

Prof. Dr. Cate Macinnis-Ng

Department of Biological Sciences, Faculty of Science, University of Auckland, Private Bag 92019, Auckland 1142, New Zealand

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia, I-25121 Brescia, Italy

Message from the Editorial Board

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank: JCR - Q1 (Forestry) / CiteScore - Q1 (Forestry)
