Statistics, Utah State University,
Logan, UT, USA

Deadline for manuscript
submissions:

closed (15 May 2021)

Message from the Guest Editor

Random Forests has been applied to data in almost every area of research in which regression, survival analysis, and classification are used. One of the earliest published papers (Prasad et al. 2006) was an application of Random Forests to forest data. For this Special Issue, we are seeking papers in all areas of application of Random Forests to forest and remote sensing data, including comparison with other methods. We are particularly interested in novel uses of prediction, model selection, and visualization of relationships between response and predictor variables.

Editors-in-Chief

Prof. Dr. Cate Macinnis-Ng

Department of Biological Sciences, Faculty of Science, University of Auckland, Private Bag 92019, Auckland 1142, New Zealand

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia, I-25121 Brescia, Italy

Message from the Editorial Board

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank: JCR - Q1 (Forestry) / CiteScore - Q1 (Forestry)
