## Spatial Decision Support for Forest Management

Guest Editor:

**Prof. Dr. Michael P. Strager**

Division of Resource Economics and Management, School of Natural Resources, Davis College of Agriculture, Natural Resources and Design, West Virginia University, Morgantown, WV 26508-6108, USA

Deadline for manuscript submissions:

**closed (30 June 2022)**

### Message from the Guest Editor

The management of forest resources is a complex undertaking involving many issues, data, people, and processes. Rarely is just one tool or model effective in management work. Integrated approaches provide more flexibility to address problems. Spatial decision support systems can provide the framework for integrating and analyzing spatial, economic, technical, or other non-commensurate data to aid in the planning process. With the many advances now emerging in computing, programming, big data analytics, and machine learning, spatial decision support systems have grown in applications to better manage forest resources. We encourage interdisciplinary submissions, including experimental studies, model development, and computer system models, to contribute to this Special Issue in order to promote knowledge and innovative strategies to expand this field of study.

## Editors-in-Chief

### Prof. Dr. Cate Macinnis-Ng

Department of Biological Sciences, Faculty of Science, University of Auckland, Private Bag 92019, Auckland 1142, New Zealand

### Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia, I-25121 Brescia, Italy

## Message from the Editorial Board

*Forests* (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

**Journal Rank:** JCR - Q1 (Forestry) / CiteScore - Q1 (Forestry)
