## Performance Testing and Service Life of Wood and Wood-Based Materials

Guest Editors:

**Prof. Dr. Joris Van Acker**

Laboratory of Wood Technology (Woodlab), Ghent University, Coupure links 653, 9000 Ghent, Belgium

**Dr. Davor Kržišnik**

Department of Wood Science and Technology, Biotechnical Faculty, University of Ljubljana, Jamnikarjeva 101, 1000 Ljubljana, Slovenia

Deadline for manuscript submissions:  
**closed (31 May 2022)**

### Message from the Guest Editors

There is growing evidence that wood-based materials have predominantly lower energy consumption and CO<sub>2</sub> emissions compared to other materials, such as concrete, brick and steel. Wood is a beneficial material in terms of its material properties, its renewable nature, its sustainable production and its ability to store sequestered carbon. Therefore, it is important to test their performance in use. Wood products are used in a variety of circumstances and often biological hazards pose a risk to their service life. Increasing service life, often referred to as wood protection, leads to new wood-based materials. New materials require an appropriate and harmonized test design that leads to performance assessment in terms of predicting service life. Therefore, in this Special Issue, we are collecting contributions from different disciplines, such as wood material science, wood technology, wood pathology, and performance test method evaluation studies. We encourage studies from all fields to advance knowledge and adapt strategies to increase service life and performance classification of wood products for different use classes.

## Editors-in-Chief

### **Prof. Dr. Cate Macinnis-Ng**

Department of Biological Sciences, Faculty of Science, University of Auckland, Private Bag 92019, Auckland 1142, New Zealand

### **Prof. Dr. Giacomo Alessandro Gerosa**

Department of Mathematics and Physics, Catholic University of Brescia, I-25121 Brescia, Italy

## Message from the Editorial Board

*Forests* (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

**Journal Rank:** JCR - Q1 (Forestry) / CiteScore - Q1 (Forestry)
