Deadline for manuscript  
submissions:

**closed (25 November 2020)**

### Message from the Guest Editor

Dear colleagues,

Climatic conditions establish the matrix of seasonal variation of precipitation and temperature, the two basic parameters that plants need to cope to grow and reproduce. At an evolutionary time-scale, plants adapted to different climatic conditions, developing diverse morphological, physiological, and phenological strategies, help to map biomes. Trees are long-lived structures and in that sense are subjected to short-term weather variations, and long-term climatic trends. In this Special issue of *Forests*, we are looking for new research, review articles, and opinion articles on the impact of climate change on trees and trying to answer some of the previous questions or new ones raised by researchers.

Dr. Cristina Nabais

## Message from the Editorial Board

*Forests* (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

**Journal Rank:** JCR - Q1 (Forestry) / CiteScore - Q1 (Forestry)
