Message from the Guest Editors

Dear Colleagues,

In recent years, coastal forested wetland degradation has caused serious ecological and environmental problems. Therefore, coastal forested wetland conservation and restoration plays an important role in slowing down the greenhouse effect and curbing global warming. We invite you to contribute your recent research in relation to understanding the effects of coastal forested wetland conservation on carbon function. The potential topics include but are not limited to:

- Ecohydrological processes in coastal forested wetland;
- Biogeochemical processes in coastal forested wetland;
- Prediction of potential wetland carbon sequestration;
- Quantification of carbon emissions in coastal forested wetland;
- Wetland carbon cycling and climate changes;
- Monitoring of the structure and function of coastal forested wetland;
- Assessment of coastal forested wetland ecosystem services.
- Solutions in "Forest-Wetland" spatial management strategies.

Message from the Editorial Board

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank: JCR - Q1 (Forestry) / CiteScore - Q1 (Forestry)
