### Message from the Guest Editors

Dear Colleagues,

Urban forests and urban vegetation as a whole generally offer multiple resources and environmental benefits to society. The functions and services they provide, such as air quality improvement, carbon sequestration, temperature reduction, etc., are directly influenced by the composition of species, the number and location of trees, their biological properties, their adaptive mechanisms, and so on. Therefore, the first step in improving the management of urban green spaces and to enhance their potential for ecosystem services is to evaluate the current structure and benefits of urban forests. This Special Issue plans to give an overview of the most recent advances in the field of ecosystem services assessment in urban areas, with a focus on urban trees and urban vegetation, as well as their valorization.

Potential topics include, but are not limited to, the following:

- Air pollutants removal;
- Carbon sequestration;
- Microclimate regulation;
- Temperature reduction;
- Biodiversity support;
- Pollinators support;
- Disservices of urban trees (pollens, volatile compounds, etc.).

## Message from the Editorial Board

*Forests* (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

**Journal Rank:** JCR - Q1 (Forestry) / CiteScore - Q1 (Forestry)
