Message from the Guest Editors

Fir and pine forests are widely represented around the world, and have important ecological, economic and social roles. There are several risks and opportunities to be addressed when managing these forests in changeable environments. Climate change might affect fir and pine forest dynamics (regeneration, growth, and mortality), and this requires adaptive management strategies. We hope that the conference and the Special Issue will contribute to advancing research on fir and pine management in changeable environments. Topics of interest include, but are not limited to, the following main themes considered in the conference:

1. Stand dynamics of fir and pine forests: regeneration, growth, mortality, dendrochronology and soil fertility;
2. Ecology and management of fir and pine species in changeable environments;
3. Gene pool and provenances of fir and pine species: improving adaptability to a changing environment;
4. Providing products and ecosystem services from fir and pine forests;
5. Silviculture and management planning given the pressure on wood requirements.

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank: JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)
