**Dr. Flavio Pereira de Oliveira**

**Dr. Tancredo Augusto Souza**

**Dr. Bruno Campos Mantovanelli**

Deadline for manuscript  
submissions:  
**closed (27 November 2023)**

### Message from the Guest Editors

Agroforestry systems are integrated combinations of trees, shrubs, agricultural crops and/or animals in the same area, simultaneously or sequentially, that seek to optimize the aggregation of socioeconomic, cultural and environmental values. These arrangements have potential for the sustainable development and use of natural resources. In this complex system, the soil and plant compartments are interconnected, so soil monitoring and management in Agroforestry is a condition for knowledge of soil health and, consequently, a strategy for maintaining carbon stocks and reducing greenhouse gas emissions. This Special Issue aims to compile works on the theme “Agroforestry Soil Fertility Monitoring and Management” that contribute to global science.

## Message from the Editor-in-Chief

*Forests* (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

**Journal Rank:** JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)
