Deadline for manuscript  
submissions:

**closed (30 September 2022)**

### Message from the Guest Editor

Dear Colleagues,

Environmental changes, e.g., increasing CO<sub>2</sub> and O<sub>3</sub>, nitrogen deposition, soil degradation, and global warming, have become important environmental issues. These problems of ‘Environmental Changes’ are now spreading worldwide. Rather than viewing environmental changes as a threat that will adversely affect forest trees, it is also an opportunity to develop innovative approaches in forest tree ecophysiology, management, and forest conservation. Understanding how the ecological and physiological responses in forest trees are affected by an environmental change is therefore fundamental to any sound prediction of future environmental changes. This Special Issue of *Forests* is calling for original, innovative papers on anatomical, morphological, ecological, and physiological tree responses, including experimental studies, monitoring approaches, and models, to environmental changes at all levels of organization, from the seedling phase to the mature stage.

Dr. Dongsu Choi

## Editors-in-Chief

### **Prof. Dr. Cate Macinnis-Ng**

Department of Biological Sciences, Faculty of Science, University of Auckland, Private Bag 92019, Auckland 1142, New Zealand

### **Prof. Dr. Giacomo Alessandro Gerosa**

Department of Mathematics and Physics, Catholic University of Brescia, I-25121 Brescia, Italy

## Message from the Editorial Board

*Forests* (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

**Journal Rank:** JCR - Q1 (Forestry) / CiteScore - Q1 (Forestry)
