## The Ecology of Fine Roots across Forest Biomes

Guest Editors:

**Dr. Antonino Di Iorio**

Department of Biotechnologies  
and Life Sciences (DBSV),  
University of Insubria, 21100  
Varese, Italy

**Prof. Dr. Agostino Sorgonà**

Dipartimento Agraria, Università  
degli Studi di Reggio Calabria,  
Reggio Calabria, Italy

Deadline for manuscript  
submissions:  
**closed (12 June 2022)**

### Message from the Guest Editors

Fine root–soil interactions fundamentally affect the terrestrial carbon (C) cycle and, thereby, ecosystem feedbacks to climate change.

This Special Issue aims to unveil the interplay between what is beyond (growth, death, and decomposition) and outside (rhizosphere) the root boundary, with special attention to species belonging to different forest biomes to better depict the fine root-derived carbon contribution to C-cycling at biome, hemisphere, and globe scales.

For this Special Issue, we welcome manuscripts that provide novel insights on a broad range of topics on fine roots, including: a) fine root dynamics and seasonal pattern, with a particular focus on the role of starch reserve; b) methods that help to improve the estimation of carbon input into the soil from exudation and decomposition processes; c) plant–plant and plant–microbe interactions, microbial community assemblage and functioning processes, as well as the responses to the environmental stresses, with a particular focus on climate change drivers. Original works, reviews and short communications are all very welcome.

## Editors-in-Chief

### **Prof. Dr. Cate Macinnis-Ng**

Department of Biological Sciences, Faculty of Science, University of Auckland, Private Bag 92019, Auckland 1142, New Zealand

### **Prof. Dr. Giacomo Alessandro Gerosa**

Department of Mathematics and Physics, Catholic University of Brescia, I-25121 Brescia, Italy

## Message from the Editorial Board

*Forests* (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

**Journal Rank:** JCR - Q1 (Forestry) / CiteScore - Q1 (Forestry)
