### **Message from the Guest Editors**

Dear Colleagues,

How forest carbon offsets can meet national, regional, and state or provincial CO<sub>2</sub> emissions reduction goals has been a focus of increasing research and advocacy attention for a decade or more. Because the biological, environmental, governance, and forest management options vary so widely across the commitments, these questions must be faced with a strong local emphasis. For this reason, we seek papers addressing the issues in temperate North America. *Forests* seeks submissions of manuscripts that address, in productive ways, the interface between science and policy in this field. We seek papers that attempt to frame important issues in the context of a real world with multiple policy goals and constraints, including costs, and that assemble and intelligently review a range of relevant existing literature on the topic.

Process: please send a one page abstract or outline of proposed piece and we will respond. Proposals offering results on single stands or forest types, big data modeling exercises, or without clear policy analysis and framing will be referred to the normal *Forests* editorial process for review and consideration in the normal course.

an Open Access Journal by MDPI

## Editors-in-Chief

### Prof. Dr. Cate Macinnis-Ng

Department of Biological Sciences, Faculty of Science, University of Auckland, Private Bag 92019, Auckland 1142, New Zealand

## Message from the Editorial Board

*Forests* (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

**Journal Rank:** JCR - Q1 (Forestry) / CiteScore - Q1 (Forestry)
