Deadline for manuscript
submissions:

closed (20 July 2017)

Message from the Guest Editor

Dear Colleagues,

The protection of forests and forest-related biodiversity is increasingly relevant. Biodiversity conservation hereby competes with increasing demands on European forests with respect to forest products and energy they do provide. The proposed session highlights state-of-the art questions on forest biodiversity and protected area management (PAM) in multi-functional forests, such as, for example:

- Positive or negative impacts of forest management practices on forest biodiversity
- Integrative or segregative approaches to enhance biodiversity conservation
- Adaptation of PAM categories to climate change
- Policy processes to influence forest-related biodiversity conservation.

Prof. Dr. Peter Spathelf

Message from the Editorial Board

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank: JCR - Q1 (Forestry) / CiteScore - Q1 (Forestry)
