Deadline for manuscript submissions: closed (10 April 2024)

Message from the Guest Editor

In the scenario of global warming, it is interesting to study changes in plant distribution and forest adaptation in the function of genera. In this sense, the Juniperus genus comprises approximately 50 coniferous trees and shrubs species that are widely distributed throughout the temperate and subtropical regions of the Northern Hemisphere. In general, Juniper species are droughttolerant and well adapted to extreme climates and severe impacts related to climate change (for example, forest fires). For this, fires and intense drought periods could favor their expansion. On the other hand, Juniper species can be utilized for forest restoration on poor sites with low potential productivity, such as arid and semi-arid climates. However, despite their ecological importance and their utility for forest restoration, studies of junipers are still incomplete in many respects. In addition, most of the data on evergreen perennials in semi-arid environments are based on sclerophylls and shrubs.

Message from the Editorial Board

Forests (ISSN 1999-4907) is an international and crossdisciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank: JCR - Q1 (Forestry) / CiteScore - Q1 (Forestry)
