

## Modeling, Measuring, and Mapping Wildland Fuels

Guest Editors:

**Dr. Russ Parsons**

US Forest Service, Rocky Mountain Research Station, Fire Sciences Laboratory, Missoula, MT, USA

**Prof. Dr. Luis A. Ruiz**

Geo-Environmental Cartography and Remote Sensing Group (CGAT), Universitat Politècnica de València, Camino de Vera s/n, 46022 Valencia, Spain

**Dr. Francois Pimont**

French National Institute for Agriculture, Food, and Environment (INRAE), Paris, France

Deadline for manuscript submissions:

**closed (12 September 2021)**

### Message from the Guest Editors

In many places across the globe, climate change has led to increased fire occurrence, with larger and more damaging fires. Amid this growing crisis, fire managers need accurate fuel maps and fire modeling for decision support, risk assessment and strategic planning efforts. However, developing fuel maps can be challenging, as wildland fuels are complex in distribution, structure and characteristics. They are dynamic, changing over time and space in response to environmental factors, disturbances and management action. In this Special Issue of *Forests*, entitled “Modeling, Measuring and Mapping Wildland Fuels”, we aim to collect timely and emerging research in wildland fuels science, with a focus on new developments, applications and technologies in mapping, measuring and modeling fuels. We encourage researchers to submit articles in a wide range of themes in this arena. Examples might include modeling fuel dynamics, novel mapping approaches, classification algorithms and image processing, new approaches for cross-scale linkages, and remote sensing methods and applications characterizing 3D fuel structure.

an Open Access Journal by MDPI

## Editors-in-Chief

### Prof. Dr. Cate Macinnis-Ng

Department of Biological Sciences, Faculty of Science, University of Auckland, Private Bag 92019, Auckland 1142, New Zealand

### Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia, I-25121 Brescia, Italy

## Message from the Editorial Board

*Forests* (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

**Journal Rank:** JCR - Q1 (Forestry) / CiteScore - Q1 (Forestry)
