

Modern Techniques of the Technogenic Affected Areas Restoration: Approaches and Solutions

Guest Editors:

Prof. Dr. Tatiana Minkina

Department of Soil Sciences and Land Resources Assessment, Academy of Biology and Biotechnology, Southern Federal University, 344006 Rostov-on-Don, Russia

Dr. Svetlana Sushkova

Academy of Biology and Biotechnology, Southern Federal University, 344006 Rostov-on-Don, Russia

Dr. Vishnu D. Rajput

Academy of Biology and Biotechnology, Southern Federal University, Stachki Ave. 194/1, 344090 Rostov-on-Don, Russia

Deadline for manuscript submissions:

closed (20 May 2022)

Message from the Guest Editors

Productive forest ecosystems, soils, vegetation and wildlife, surface and ground waters, atmospheric air, and subsoil are subjected to technological stress and transformation ubiquitously. One of the important tasks of the scientists is searching the way of the modern techniques and methods to remediate the technogenic affected sites that could contribute to effective restoration. In this connection, the manuscripts should be devoted to the natural ecosystem recovery, that presents the unity of vegetation community, biologically saturated with organic substance of the prolific layer, and the microbiome community in it, that transforms the plant remains. It is thus expedient to consider the complex of chemical, physical, biological, and agrotechnical receptions not only as a way of restoration of a vegetative cover, and it is rather as a push, a stimulator for acceleration of the natural self-recovery, caused by improvement of physical and agrochemical properties of the soil. In this regard, it is of high relevance to study the principles of developing new methods of soil restoration in areas of increased anthropogenic impact.

Message from the Editorial Board

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank: JCR - Q1 (Forestry) / CiteScore - Q1 (Forestry)
