## Performance and Modification of Wood and Wood-Based Materials

Guest Editors:

**Dr. Tomasz Krystofiak**

Laboratory of Gluing and Finishing of Surface, Department of Wood Science and Thermal Techniques, Poznan University of Life Sciences, Wojska Polskiego 38/42 St., 60-627 Poznan, Poland

**Prof. Dr. Pavlo Bekhta**

Department of Wood-Based Composites, Cellulose and Paper, Ukrainian National Forestry University, 79057 Lviv, Ukraine

Deadline for manuscript submissions:

**closed (25 November 2022)**

### Message from the Guest Editors

Wood remains one of the most attractive construction materials. However, its applications are limited because it undergoes biological degradation, is combustible, and changes its properties under the influence of weathering conditions. Many of these disadvantages of solid wood are to some extent eliminated in wood-based materials such as plywood, particleboard, fiberboard, OSB, etc. Therefore, the problem of improving the properties of wood and wood-based materials is still in need of solutions. One of the effective ways to improve the properties of wood and wood-based materials is to modify them by conventional (thermal, chemical etc.) or the latest (plasma treatment) processes. With regard to wood-based materials, it is possible to treat their components (particles, fibers, glue, etc.) and the use them in wood-based materials or to use the post-treatment of ready-made materials to improve their certain properties.

Emphasis in this Special Issue is placed on updating and expanding the knowledge concerning conventional and novel modification processes of wood and wood-based materials, their improved/modified properties, and their relevant applications.

## Editors-in-Chief

### **Prof. Dr. Cate Macinnis-Ng**

Department of Biological Sciences, Faculty of Science, University of Auckland, Private Bag 92019, Auckland 1142, New Zealand

### **Prof. Dr. Giacomo Alessandro Gerosa**

Department of Mathematics and Physics, Catholic University of Brescia, I-25121 Brescia, Italy

## Message from the Editorial Board

*Forests* (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

**Journal Rank:** JCR - Q1 (Forestry) / CiteScore - Q1 (Forestry)
