Institute of Biology, Freie
Universität Berlin, Berlin,
Germany

Deadline for manuscript
submissions:

closed (10 February 2022)

Message from the Guest Editors

Forest tree growth requires efficient uptake of essential nutrients from heterogeneous and often depleted soil environments. This process involves complex physiological regulations within roots, but also between aboveground and belowground plant parts and at the root–soil microbiome interface. New tools are available for the study of plant roots, the rhizosphere, and the soil microbiome, improving research into how conventional and organic fertilization practices and rising nutrient depositions affect plant-microbial interactions, soil microbial nutrient cycling and consequently the nutrition of trees and other forest vegetation.

This Special Issue is dedicated to new knowledge and understanding of these interactions as they relate to plant nutrition in the context of fertilization practices; environmental change and decision-making; use of the latest observational or analytical methods or develop new modeling frameworks to capture and/or predict outcomes of plant-soil-microbial interactions on plant nutrition; innovative or targeted fertilization approaches; practices; or fertilizer sources.

an Open Access Journal by MDPI

Editors-in-Chief

Prof. Dr. Cate Macinnis-Ng

Department of Biological Sciences, Faculty of Science, University of Auckland, Private Bag 92019, Auckland 1142, New Zealand

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia, I-25121 Brescia, Italy

Message from the Editorial Board

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank: JCR - Q1 (Forestry) / CiteScore - Q1 (Forestry)
