Genetic Control of Forest Tree Traits and Their Interaction with Environment

Guest Editor:

Dr. María Rosario García-Gil
Umeå Plant Science Centre
(UPSC), Department of Forest
Genetics and Plant Physiology,
Swedish University of Agricultural
Sciences, SE-901-83 Umeå,
Sweden

Deadline for manuscript
submissions:

closed (28 February 2022)

Message from the Guest Editor

Sustainable forestry is a cornerstone in the transition to the post-carbon economy, where forests play a key role as a source of sustainable biomass. The growing demand for biomass is being challenged by the negative impact of climate change on forest productivity caused by multiple biotic and abiotic stress. This urges a better understanding of the genetic control of forest tree traits associated to production, and to develop models for accelerated assisted adaptation of our forests to guarantee a healthy and productive feedstock. We call for research works in the field of forest genetics that advance our understanding on the genetic control of forest tree traits of economic and ecological value, and their interaction with a changing environment. We encourage for research works that provide novel models for the implementation of genomics and remote sensing tools to accelerate and assist forest genetic adaptation to secure production and biodiversity.

Editors-in-Chief

Prof. Dr. Cate Macinnis-Ng

Department of Biological Sciences, Faculty of Science, University of Auckland, Private Bag 92019, Auckland 1142, New Zealand

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia, I-25121 Brescia, Italy

Message from the Editorial Board

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank: JCR - Q1 (Forestry) / CiteScore - Q1 (Forestry)
