Message from the Guest Editor

Tree adaptation to changing environments includes morphological, anatomical, and physiological aspects of plant response to external forcing factors. However, it is often unclear how the adaptation of wood functional traits to changing climate affects tree growth and wood production. While most of these responses are studied on the individual tree level, upscaling to the species level or to forest ecosystems still remains challenging. This Special Issue of *Forests* invites contributions describing advances in methodological aspects on quantitative wood anatomy, wood formation dynamics, and scaling problems to larger spatial scales. A special focus lies on approaches linking functional wood anatomy with tree growth and forest responses to climatic change, including aspects of adaptation to expected future climate conditions and tree mortality. Furthermore, case studies from environments which are still hardly studied, e.g., tropical climate zones or high mountain regions are of great interest.

an Open Access Journal by MDPI

Editors-in-Chief

Prof. Dr. Cate Macinnis-Ng

Department of Biological Sciences, Faculty of Science, University of Auckland, Private Bag 92019, Auckland 1142, New Zealand

Message from the Editorial Board

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank: JCR - Q1 (Forestry) / CiteScore - Q1 (Forestry)
