Message from the Guest Editors

Raw wood is one of the most important forestry products. Assumptions about a gradual decline in the use of wood from the last century have not been fulfilled, but on the contrary, the position of raw wood and wood products is constantly strengthening. In 1900, about 1,800 methods of various uses of wood for final products or raw materials for other processing industries were known. In 1920, 2,200 methods of using raw wood were mentioned, in 1950 about 5,000 and in 1970, up to 18,000 methods of using raw wood and wood products were recorded. The possibilities of wood recovery and utilization continue to expand.

New possibilities for qualitative evaluation of wood and wood products have experienced dynamic development in the last decade, along with the development of information technologies.

The aim and focus of the special issue is to bring new knowledge from these areas. It focuses mainly on the qualitative evaluation of wood and wood products, research of new wood products with significant potential for the forestry and wood processing complex, research of quality properties of raw or specially treated wood and wood products.

Message from the Editorial Board

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank: JCR - Q1 (Forestry) / CiteScore - Q1 (Forestry)
