

Special Issue

Forest Adaptation and Restoration in a Changing Environment

Message from the Guest Editor

Forest adaptation to climate change effects is immediately needed. Forest managers have created a vision on the effects of climate change on forest ecosystems. However, there is concern that the current pace of warming and the associated change in weather patterns. Foresters need to develop and implement adaptation strategies in order to ensure that forests stay vital and continuously are able to fulfill the manifold expectations of society on forests. Functional forests are providing ecosystem services and play an important part in climate change mitigation. Silvicultural strategies are sought that increase the stability and resilience of forests. An important aspect is the restoration of degraded forests in order to ensure that forests are lasting carbon sinks and habitats for biodiversity. Restoration of degraded ecosystems is the target of several international initiatives. In this special issue of forests we seek reports of successful adaptation measures from different parts of the world that include a thorough problem analysis and the implementation of countermeasures. The submission of manuscripts is encouraged that cover the fields of forest ecology and forest policy.

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia,
I-25121 Brescia, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2025).
