

## Special Issue

# Rare, Non-native and Invasive Plant Species: Structure, Properties and Potential Applications

### Message from the Guest Editor

Due to the rapidly growing demand, finding new sources of raw materials already presents a real challenge. Current studies on ongoing projects show that alien and invasive plant species can be an important source of raw materials. In this Special Issue, we focus mainly on research into rare, non-native, and invasive species from which we can extract raw materials for the manufacture of various products. For example, such trees are most often found in an urban environment. Of course, we cannot expect the same material efficiency from trees from urban environments as from commercially managed forests. Trees in the urban environment are often damaged by various interventions and consequently infected with various fungi. Early changes in wood cause a series of successive processes that affect the anatomical and chemical structure as well as other properties of the wood. Nevertheless, the use of wood from urban trees of non-native species has certain advantages. We can find extremely colorful and above all unique textures in certain species, which are simply not present in native conventional species.

## About the Journal

### Message from the Editor-in-Chief

*Forests* (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

#### Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2025).
