Deadline for manuscript submissions:

closed (31 October 2024)

Message from the Guest Editors

Dear Colleagues,

Fractional differential equations are being applied in medicine (modelling of human tissue under mechanical loads), (bio)chemistry (modelling of polymers and proteins), mechanics (theory of viscoelasticity), electrical engineering (transmission of ultrasound waves), etc.

The aim of this Special Issue is to present some of the recent developments in the theory, methods, and applications of certain particularly important special cases which will demonstrate a rich variety of phenomena that may be encountered in the investigation of regular and singular fractional differential equations. Singular equations will lead to solutions with properties that differ substantially from those that we have seen for regular problems.

The key objective of this Special Issue is to provide novel developments that may inspire advances or be used for the construction of numerical methods for fractional differential equations.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Fractal and Fractional (*Fractal Fract.*) is a scholarly online journal which provides a forum for discussion on new original models and methods in fractals and fractional calculus both from theory and applications. It is a peer-reviewed, open access journal that publishes high quality original research articles, review papers and short communications.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [Inspec](#), and [other databases](#).

Journal Rank: JCR - Q1 (Mathematics, Interdisciplinary Applications) / CiteScore - Q1 (Analysis)
