Deadline for manuscript
submissions:

closed (31 August 2024)

Message from the Guest Editors

The focus of this Special Issue is to continue to advance research on topics relating to the theories, models, algorithms, and applications of fractal analysis in geology and geochemistry. Topics that are invited for submission include (but are not limited to):

- Fractal modeling of geochemical data;
- Fractal analysis in mineral prospectivity mapping;
- Fractal modeling of extreme geological events;
- Fractal modeling of ore deposits;
- Fractal modeling of faults and/or fractures;
- Fractal modeling of geothermal resources;
- Fractal analysis in geological data fusion;
- Fractal modeling of geological and/or geochemical processes;
- Fractal analysis of minerals and rocks.
