Automating Process of Big Data Analytics Using Service Composition

Guest Editors:

Prof. Dr. Incheon Paik

Intelligent Data Analytics
laboratory, Division of
Information Systems, School of
Computer Science and
Engineering, The University of
Aizu, Fukushima 965-8580, Japan

Prof. Dr. B. T. G. Samantha Kumara

Department of Computing and
Information Systems, Faculty of
Applied Sciences,
Sabaragamuwa University of Sri
Lanka, Colombo, Sri Lanka

Message from the Guest Editors

Dear Colleagues,

Big data analytics (BDA) extract valuable knowledge from large sets of data and provide support for decision making by discovering patterns. The automatic BDA process can be improved significantly by utilizing machine learning (ML) and deep learning (DL) approaches. In this Special Issue, topics including, but not limited to, BDA, the automation of BDA via ASC, and the application of ML/DL regarding BDA and its automation can be covered.

Deadline for manuscript
submissions:

closed (30 May 2022)

Architecture, University of Parma,
Parco Area delle Scienze, 181/A,
43124 Parma, Italy

Message from the Editor-in-Chief

Future Internet is a fast-growing journal devoted to rapid publications of the latest results in the general areas of computer networking/communications and information systems, with a focus on the Internet of Things, big data and augmented intelligence, smart systems (in terms of technologies, architectures, and applications), network virtualization, edge/fog computing, and cybersecurity. Both theoretical and experimental papers are welcome. Every year, *Future Internet* also features Special Issues dedicated to specific topics within the journal's scope.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), Ei Compendex, dblp, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Computer Science, Information Systems*) / CiteScore - Q1 (Computer Networks and Communications)
