Deadline for manuscript
submissions:
closed (30 May 2023)

Message from the Guest Editors

Dear Colleagues,

The use of data-driven approaches for decision making
and process management has become ubiquitous in
several fields ranging from manufacturing to software
development. Moreover, there has been a growing body of
literature focusing on techniques for collecting data and
designing key performance indicators that can provide
helpful insights into the application at hand. This Special
Issue focuses on presenting state-of-the-art research on
the effectiveness of statistical models, features and
indicators to increase efficiency in software engineering.
Authors are encouraged to submit high-quality work
addressing recurrent and challenging issues to predict,
identify and mitigate errors and risks.

Prof. Dr. Manuel Mazzara
Prof. Dr. Adriano Bessa Albuquerque
Dr. Luiz Jonata Pires de Araujo

Message from the Editor-in-Chief

Future Internet is a fast-growing journal devoted to rapid publications of the latest results in the general areas of computer networking/communications and information systems, with a focus on the Internet of Things, big data and augmented intelligence, smart systems (in terms of technologies, architectures, and applications), network virtualization, edge/fog computing, and cybersecurity. Both theoretical and experimental papers are welcome. Every year, *Future Internet* also features Special Issues dedicated to specific topics within the journal's scope.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, ESCI (Web of Science), Ei Compendex, dblp, Inspec, and other databases.
Journal Rank: JCR - Q2 (*Computer Science, Information Systems*) / CiteScore - Q1 (Computer Networks and Communications)
