Message from the Guest Editors

This special issue is dedicated to the analysis and the optimization of MASs from a wide point of view (including also branches potentially applicable in MASs); therefore, potential topics include but are not limited to the following:

- wireless networks
- Internet of Things
- distributed and parallel computing
- cloud computing
- data aggregation, sensor fusion
- signal processing
- modeling by the big data from the multi-sensor systems
- possibility theory
- remote sensing data processing
- artificial intelligence for the multi-sensor fusion systems
- routing protocols
- communication protocols
- optical systems

Message from the Editor-in-Chief

Future Internet is a fast-growing journal devoted to rapid publications of the latest results in the general areas of computer networking/communications and information systems, with a focus on the Internet of Things, big data and augmented intelligence, smart systems (in terms of technologies, architectures, and applications), network virtualization, edge/fog computing, and cybersecurity. Both theoretical and experimental papers are welcome. Every year, *Future Internet* also features Special Issues dedicated to specific topics within the journal's scope.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), Ei Compendex, dblp, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Computer Science, Information Systems*) / CiteScore - Q1 (Computer Networks and Communications)
