Prof. Dr. Guillermina Jasso

Message from the Guest Editors

In this Special Issue, we aim to direct the reader's attention toward fairness in non-cooperative human interactions; moreover, we intend to present a comprehensive review of current models and experimental studies on fairness in strategic interactions alongside new, unpublished models and results. We welcome original and review papers pertaining to the following:

Deadline for manuscript
submissions:

30 November 2024

1. Are humans fair by their nature, or is fairness an emergent trait cultivated by education, social norms, and religious ethics?
2. To what extent are fairness and cooperative perceptions and behaviors correlated?
3. Theoretical and simulation models pertaining to the possibility of the evolution of fair behavior in small and large groups.
4. Individual and societal differences in fairness perceptions and behaviors.
5. The neurophysiological correlates of fair perception and behavior.
