# Government and Coalition Formation

### Message from the Guest Editor

In parliamentary democracies, political parties bargain over the allocation of cabinet portfolios when forming coalition governments. For this reason, most theoretical models of government formation focus on the assumption that agents (the legislative parties) are primarily office-seeking. However, office-motivated politicians are interested not only in maximizing their office benefits but also in minimizing the “transaction costs” of the bargaining process over the government coalition policy. Two major research areas of government formation have emerged from this consideration. On the one hand, what coalition of parliamentary parties is more likely to form and what are the features, as size, ideological congruence, or previous government experience, that determine whether a coalition is more likely to emerge? On the other hand, what features make a government coalition more likely to survive and be stable?

## About the Journal

### Message from the Editorial Board

---

#### Editors-in-Chief

Prof. Dr. Ulrich Berger

WU Vienna, Department of Economics, Welthandelsplatz 1, 1020 Wien,  
Austria

Prof. Dr. Kjell Hausken

Faculty of Science and Technology, University of Stavanger, 4036  
Stavanger, Norway

---

#### Author Benefits

##### High Visibility:

indexed within Scopus, ESCI (Web of Science),  
MathSciNet, zbMATH, RePEc, EconLit, EconBiz, and other  
databases.

##### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 24.8 days after  
submission; acceptance to publication is undertaken in 3.6  
days (median values for papers published in this journal in  
the second half of 2024).

##### Recognition of Reviewers:

reviewers who provide timely, thorough peer-review  
reports receive vouchers entitling them to a discount on  
the APC of their next publication in any MDPI journal, in  
appreciation of the work done.
