## Special Issue

# Social Learning and Cultural Evolution

### Message from the Guest Editor

This is a call to all those working in Anthropology, Biology, Economics, Machine Learning, Mathematics, Psychology, Sociology and related fields to come together and share their insights in this very exciting field. Alone, we are weak; together, we are strong. We communicate and learn from one another. What we do influences what others do through social learning. Together, we form a society, developing a culture that has its own dynamics via cultural evolution. How does the individual entity influence the large and vice versa? What rules do we use and why? How does individual behavior influence the mass, and create and stabilize norms? In this special issue, we invite papers using different methods, from theory to simulations to data analyses, from a focus on individual behavior to a focus on learning as a population or society, as animals, humans or machines, towards contributions to research on social learning and cultural evolution. I am eagerly awaiting your contributions.

### Author Benefits

**High Visibility:**
indexed within Scopus, ESCI (Web of Science),
MathSciNet, zbMATH, RePEc, EconLit, EconBiz, and other
databases.

**Rapid Publication:**
manuscripts are peer-reviewed and a first decision is
provided to authors approximately 35.8 days after
submission; acceptance to publication is undertaken in 6.7
days (median values for papers published in this journal in
the second half of 2025).

**Recognition of Reviewers:**
reviewers who provide timely, thorough peer-review
reports receive vouchers entitling them to a discount on
the APC of their next publication in any MDPI journal, in
appreciation of the work done.
