The journal *Gels* (ISSN 2310-2861) is an international, open access journal on physical (supramolecular) and chemical gel-based materials. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. Therefore, there is no restriction on the length of the papers, and full experimental details must be provided so that the results can be reproduced. Short communications, full research papers, and review papers are accepted.
