Gel-Related Papers from the 9th Asian Conference on Colloid and Interface Science 2023 (ACCIS 2023)

Guest Editors:

Dr. Guanqing Sun

School of Chemical and Material Engineering, Jiangnan University, Wuxi 214122, China

Dr. Huan Tan

College of Medicine, Southwest Jiaotong University, Chengdu 610031, China

Prof. Dr. To Ngai

Department of Chemistry, The Chinese University of Hong Kong, Hong Kong 999077, China

Deadline for manuscript submissions:

closed (30 April 2025)

Message from the Guest Editors

Dear Colleagues,

The 9th Asian Conference on Colloid and Interface Science (ACCIS) will be held at The Chinese University of Hong Kong, Hong Kong, China, during 12–15 December, 2023. Speakers who present at the conference on colloids and interface science are invited to submit full papers to this Special Issue for publication in Gels. Gels are physically or chemically crosslinked materials ranging from nanoparticles to bulk materials. In the research and applications of gels, colloid and interface science plays an immeasurable role in developing more in-depth insights into this special material.

This Special Issue of Gels will publish high-quality original research papers on extensive areas of colloid and interface science including both fundamental theories and technological applications that can contribute to the development of more advanced gel materials and uses of gels in various research fields. Preferentially, authors covering the following topics in presentations at the conference.

Editors-in-Chief

Prof. Dr. Esmail Jabbari

Biomimetic Materials and Tissue Engineering Laboratory,
Department of Chemical Engineering, University of South Carolina, Columbia, SC 29208, USA

Prof. Dr. Chuanliang Feng

State Key Lab of Metal Matrix Composites, School of Materials Science and Engineering, Shanghai Jiao Tong University, Shanghai 200240, China

Message from the Editorial Board

Gels (ISSN 2310-2861) is recently established international, open access journal on physical and chemical gel-based materials. The journal aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. General topics include but not limited to synthesis, characterization and applications of new organogels, hydrogels and ionic gels made either from low molecular weight compounds or polymers, composite and hybrid materials where a metal is by some means incorporated into the gel network, and computational studies of these materials in order to provide a better understanding of gelation mechanism. We cordially invite you to consider publishing with us and contribute with your own grain of sand to the advance in this fascinating field.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q1 (Polymer Science) / CiteScore - Q1 (Organic Chemistry)
