Message from the Collection Editor

Dear Colleagues,

The topic collection “Feature Papers in Gel Materials” will comprise important contributions by scholars in the field of gel science and Editorial Board members of *Gels*. The main objective of this Topic Collection is to provide an overview of the main challenges that exist in important areas within the broad field of gel-based materials. A series of key authors will address this discussion in a free format, and according to their particular areas of expertise. We look forward to your submissions to this anticipated collection of exciting, top-quality papers covering the latest findings in gel science.

Prof. Dr. David Díaz Díaz

Message from the Editor-in-Chief

Gels (ISSN 2310-2861) is recently established international, open access journal on physical and chemical gel-based materials. The journal aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. General topics include but not limited to synthesis, characterization and applications of new organogels, hydrogels and ionic gels made either from low molecular weight compounds or polymers, composite and hybrid materials where a metal is by some means incorporated into the gel network, and computational studies of these materials in order to provide a better understanding of gelation mechanism. We cordially invite you to consider publishing with us and contribute with your own grain of sand to the advance in this fascinating field.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q1 (Polymer Science) / CiteScore - Q2 (Polymers and Plastics)
