Deadline for manuscript
submissions:

30 November 2024

Message from the Guest Editor

Dear Colleagues,

We invite contributors to examine the ways in which individual, community and environmental health affect human and non-human persons and how individuals, communities, nations and ecology work to promote health and wellbeing among Indigenous Peoples. We also invite exploration of Indigenous determinants and indicators of health as well as specifically Indigenous ways of being, knowing and doing in relation to health and wellbeing. We define health and wellbeing broadly as the balance among multiple interconnected dimensions of wellbeing (e.g., spiritual, physical, emotional, social, intellectual, environmental, etc.) and the environment through, between, and within generations.

We encourage submissions from Indigenous Peoples that explore Indigenous perspectives, paradigms, pedagogy, practices, principles and protocol that helps to reclaim and restore Indigenous health and wellbeing. Of particular interest is research and practice that is conducted by, grounded in or engaged with Indigenous nations, corporations, communities, villages, societies or individuals, and their wisdom, knowledge, experiences or cultures.
