

Origin and History of Family through Genetics

Guest Editor:

Dr. Sara Palomo-Díez

Legal Medicine, Psychiatry and Pathology Department, Medicine school, Complutense University of Madrid, 28040 Madrid, Spain

Deadline for manuscript submissions:

closed (22 October 2023)

Message from the Guest Editor

For this issue, the Editorial Board wishes to discuss and examine how genetic analysis can lead to greater knowledge about the “Family” origin and history, through kinship analysis or lineage analysis. I would like to invite you to contribute an article of your choosing on an aspect or application of genetic analysis to family and kinship.

Papers that study or work on possible family groups from different perspectives and using different genetic markers, both autosomal and lineage markers, will be accepted as long as they provide relevant information on the concept of family in different cultures and historical periods. Bibliographic review papers on the same topic will also be accepted. We invite contributors to discuss and examine how genetic analysis can lead to greater knowledge about the “Family” concept and kinship, whether it is close or not, using both traditional tools and new human genotype methodologies.

an Open Access Journal by MDPI

Editors-in-Chief

Dr. Athena Leoussi
