Advances in Cotton Breeding and Genetics

Guest Editors:

Dr. Abdul Razzaq

1. State Key Laboratory of Cotton Biology, Key Laboratory of Biological and Genetic Breeding of Cotton, The Ministry of Agriculture, Institute of Cotton Research, Chinese Academy of Agricultural Science, Anyang 455000, China

2. Institute of Molecular Biology and Biotechnology, The University of Lahore, Lahore, Pakistan

Dr. Muhammad Mubashar Zafar

1. State Key Laboratory of Cotton Biology, Key Laboratory of Biological and Genetic Breeding of Cotton, The Ministry of Agriculture, Institute of Cotton Research, Chinese Academy of Agricultural Science, Anyang 455000, China

2. Department of Plant Breeding and Genetics, University of Agriculture Faisalabad, Faisalabad 38040, Pakistan

Message from the Guest Editors

Dear Colleagues,

Plant genetics and genomics are used to make advances in the areas of cotton breeding, evolution, genetics, gene regulation, phenotype–genotype relationships, functional genomics, cotton fiber development, insect-resistant cotton, bioinformatics and biotechnology. We invite fundamental research on cotton genes and genomics using experimental and computational approaches. We aim to promote research communication in the areas of cotton science by providing a unified forum for scientists working in agriculture and botany to share their latest findings with a broad audience worldwide. *Genes* publishes original articles, reviews and communications in a timely manner. There are no restrictions on word count, number of figures, or amount of supporting information.

Deadline for manuscript

(August 2023)

Special Issue

genes

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Selvarangan Ponnazhagan

Department of Pathology, The University of Alabama at Birmingham, 1825 University Blvd, SHEL 814, Birmingham, AL 35294-2182, USA

Message from the Editor-in-Chief

Genes are central to our understanding of biology, and modern advances such as genomics and genome editing have maintained genetics as a vibrant, diverse and fastmoving field. There is a need for good quality, open access journals in this area, and the *Genes* team aims to provide expert manuscript handling, serious peer review, and rapid publication across the whole discipline of genetics. Starting in 2010, the journal is now well established and recognised.

Why not consider *Genes* for your next genetics paper?

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

Journal Rank: JCR - Q2 (*Genetics and Heredity*) / CiteScore - Q2 (*Genetics (clinical)*)
