Genetic Predispositions to Tumors of the Digestive System

Guest Editors:

Prof. Dr. Andrzej Pławski

Dr. Szymon Hryhorowicz

Dr. Marta Kaczmarek-Rys

Prof. Dr. Tadeusz Dębniak

Deadline for manuscript
submissions:

closed (20 June 2023)

Message from the Guest Editors

We would like to invite you to participate in this Special Issue, “Genetic Predispositions to Tumors of the Digestive System.”

Tumors in the digestive system include the neoplasm of the gastrointestinal tract from the mouth through successive parts of the digestive tract down to the anus and tumors of the pancreas, liver, and biliary tract. Identifying genetic factors that increase the risk of digestive system tumors will improve prevention and patient care.

Here, we aim to present the latest discoveries and organize the knowledge of predisposition to digestive-system tumors, strong predisposition (frequent or rare) and genetic factors that increase risk at a lower level, as this knowledge is becoming increasingly important.

This Special Issue aims to present original research and review papers that help in our understanding of the genetic basis of digestive-system tumors and apply this knowledge in prevention and treatment. New findings, confirmatory results, and conflicting results will also be considered for publication.

Message from the Editor-in-Chief

Genes are central to our understanding of biology, and modern advances such as genomics and genome editing have maintained genetics as a vibrant, diverse and fastmoving field. There is a need for good quality, open access journals in this area, and the *Genes* team aims to provide expert manuscript handling, serious peer review, and rapid publication across the whole discipline of genetics. Starting in 2010, the journal is now well established and recognised.

Why not consider *Genes* for your next genetics paper?

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

Journal Rank: JCR - Q2 (*Genetics and Heredity*) / CiteScore - Q2 (*Genetics (clinical)*)
