## Genetics and Genomics of Microbiome

Guest Editors:

### **Dr. Cheng Li**

Department of Biology,  
Massachusetts Institute of  
Technology, Cambridge, MA  
02139, USA

### **Dr. Yangong Lv**

College of Biological Engineering,  
Henan University of Technology,  
Zhengzhou 450001, China

### **Dr. Yanrui Ye**

School of Biological Science and  
Engineering, South China  
University of Technology,  
Guangzhou 510640, China

Deadline for manuscript  
submissions:

**closed (20 February 2025)**

### **Message from the Guest Editors**

Dear Colleagues,

In recent years, tremendous progress has been made in synthetic biology, enabling the production of biochemicals, therapeutics, and food ingredients using a variety of host organisms. Synthetic biologists have enabled us to engineer microbial cells for useful purposes by rewriting and editing their genomes. With the emergence of a variety of powerful genome engineering techniques, such as CRISPR/Cas systems, our ability to engineer microbial genomes has substantially improved in recent years. However, rationally designing and reshaping a genome to produce the desired phenotype remains enormously difficult, and more genome engineering strategies need to be explored. To explore this fast-growing field, this Special Issue will cover the bioinformatics of the microbiome, the latest genome engineering tools, other synthetic biology techniques, and their applications to give rise to improved or novel phenotypes in microorganisms.

## Editor-in-Chief

**Prof. Dr. Selvarangan  
Ponnazhagan**

Experimental Cancer  
Therapeutics, The University of  
Alabama at Birmingham, 1825  
University Blvd., SHEL 814,  
Birmingham, AL 35294-2182, USA

## Message from the Editor-in-Chief

*Genes* is central to our understanding of biology, and modern advances such as genomics and genome editing have maintained genetics as a vibrant, diverse and fast-moving field. There is a need for good quality, open access journals in this area, and the *Genes* team aims to provide expert manuscript handling, serious peer review, and rapid publication across the whole discipline of genetics. Starting in 2010, the journal is now well established and recognised. Why not consider *Genes* for your next genetics paper?

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

**Journal Rank:** JCR - Q2 (Genetics and Heredity) / CiteScore - Q2 (Genetics (clinical))
