Deadline for manuscript
submissions:

closed (20 September 2022)

Message from the Guest Editor

Dear Colleagues,

As the Guest Editor of the Special Issue “Advances in the Genetics of Colorectal Cancer (CRC)” by the journal *Genes*, I am delighted to invite you to contribute an original research or review article that addresses this evolving topic.

Colorectal cancer genetics research has taken a sharp turn since the era of **next-generation sequencing (NGS)**, with an incredible volume of information and the discovery of new genetic alterations related to **colorectal neoplasia, risk prediction algorithms, interaction of genetics with lifestyle**, and more. However, clinical practice is trying to catch up with the vast information in order to give **sound screening** and **surveillance recommendations, predict risks**, and **personalize treatment**.

Due to your professional interest in this topic, we would be privileged to receive a manuscript from your group related to the above topic. Papers submitted will be subjected to peer review.

I anticipate your positive response.

Sincerely,
Prof. Dr. Revital Kariv
Guest Editor

Message from the Editor-in-Chief

Genes are central to our understanding of biology, and modern advances such as genomics and genome editing have maintained genetics as a vibrant, diverse and fastmoving field. There is a need for good quality, open access journals in this area, and the *Genes* team aims to provide expert manuscript handling, serious peer review, and rapid publication across the whole discipline of genetics. Starting in 2010, the journal is now well established and recognised.

Why not consider *Genes* for your next genetics paper?

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

Journal Rank: JCR - Q2 (*Genetics and Heredity*) / CiteScore - Q2 (*Genetics (clinical)*)
