## Molecular Biology and Treatment of Genodermatoses

Guest Editor:

**Prof. Dr. Holm Schneider**

Center for Ectodermal Dysplasias  
& Department of Pediatrics,  
University Hospital Erlangen,  
Loschgestr. 15, 91054 Erlangen,  
Germany

Deadline for manuscript  
submissions:

**closed (1 October 2022)**

### Message from the Guest Editor

Dear Colleagues,

Genodermatoses, a heterogeneous group of congenital skin diseases, are considered to be rare disorders. Recent advances in elucidating the molecular basis of such diseases have contributed to early diagnosis, paving the way to innovative therapeutic approaches, e.g., protein replacement and gene therapies. A better molecular understanding of genodermatoses biology may also provide clues to genetic conditions that do not affect the skin primarily, but are associated with characteristic and clinically significant cutaneous symptoms.

This Special Issue will focus on translational research and clinical trials aimed at improving the lives of patients with hereditary ichthyoses, phakomatoses, increased skin fragility, photosensitivity, skin tumorigenesis, cutis laxa, or defective skin appendages. We welcome original research, review articles, opinions, clinical trial protocols or findings of clinical trials, and encourage both scientists and clinicians to share their points of view.

## Editor-in-Chief

### **Prof. Dr. Selvarangan Ponnazhagan**

Department of Pathology, The University of Alabama at Birmingham, 1825 University Blvd, SHEL 814, Birmingham, AL 35294-2182, USA

## Message from the Editor-in-Chief

Genes are central to our understanding of biology, and modern advances such as genomics and genome editing have maintained genetics as a vibrant, diverse and fastmoving field. There is a need for good quality, open access journals in this area, and the *Genes* team aims to provide expert manuscript handling, serious peer review, and rapid publication across the whole discipline of genetics. Starting in 2010, the journal is now well established and recognised.

Why not consider *Genes* for your next genetics paper?

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

**Journal Rank:** JCR - Q2 (*Genetics and Heredity*) / CiteScore - Q2 (*Genetics (clinical)*)
