Recent Advances in Forensic Genetics

Guest Editor:

Dr. Ana Freire-Aradas

Forensic Genetics Unit, Institute
of Forensic Sciences,
Universidade de Santiago de
Compostela, Santiago de
Compostela, Spain

Deadline for manuscript
submissions:

20 December 2024

Message from the Guest Editor

Forensic genetics is a discipline that has largely evolved in recent years. DNA extracted from biological traces can be used for human identification, criminalistic investigations or kindship analyses. In addition, in cases where no reference samples are available, forensic DNA phenotyping plays a pivotal role. Furthermore, additional applications in forensic analyses, such as the assessment of the human and soil microbiome, among others, begin to shed light. These aims and applications have been strengthened by the discovery of novel markers, the development of new DNA technologies and the improvement of bioinformatic analyses, and they will be covered in our Special Issue, entitled “Recent Advances in Forensic Genetics,” in order to provide a general overview of the current progress in this field. In this way, we will focus on advancements that have broadened the range of molecular tools that can be applied in complex forensic casework analyses.

Message from the Editor-in-Chief

Genes are central to our understanding of biology, and modern advances such as genomics and genome editing have maintained genetics as a vibrant, diverse and fastmoving field. There is a need for good quality, open access journals in this area, and the *Genes* team aims to provide expert manuscript handling, serious peer review, and rapid publication across the whole discipline of genetics. Starting in 2010, the journal is now well established and recognised.

Why not consider *Genes* for your next genetics paper?

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

Journal Rank: JCR - Q2 (*Genetics and Heredity*) / CiteScore - Q2 (*Genetics (clinical)*)
