dello Sviluppo, Università di  
Genova, Genova, Italy  
2. UOSD Laboratorio di Genetica  
e Genomica delle Malattie Rare,  
IRCCS Giannina Gaslini, Genova,  
Italy

Deadline for manuscript  
submissions:

**closed (20 November 2021)**

### **Message from the Guest Editor**

The vast majority of the genome produces transcripts that are not translated into proteins and are generally defined as non-coding RNA (ncRNA); however, several studies have revealed that they are not silent and that most of them play a crucial role in regulating gene expression.

This Special Issue focuses on the role of ncRNAs in the molecular pathogenesis of rare diseases, particularly focusing on their dysregulation and possible use as targets for molecular diagnosis and developing therapies for this class of disorders, which often lack specific treatments.

## Editor-in-Chief

### **Prof. Dr. Selvarangan Ponnazhagan**

Department of Pathology, The  
University of Alabama at  
Birmingham, 1825 University  
Blvd, SHEL 814, Birmingham, AL  
35294-2182, USA

## Message from the Editor-in-Chief

*Genes* is central to our understanding of biology, and modern advances such as genomics and genome editing have maintained genetics as a vibrant, diverse and fast-moving field. There is a need for good quality, open access journals in this area, and the *Genes* team aims to provide expert manuscript handling, serious peer review, and rapid publication across the whole discipline of genetics. Starting in 2010, the journal is now well established and recognised. Why not consider *Genes* for your next genetics paper?

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

**Journal Rank:** JCR - Q2 (Genetics and Heredity) / CiteScore - Q2 (Genetics (clinical))
