Genetics and Genomics of Rapeseed Breeding

Guest Editors:

Dr. Jin Wang

School of Life Sciences, Jiangsu University, Zhenjiang 212013, China

Dr. Yang Zhu

Department of Agronomy and Plant Breeding, College of Agriculture and Biotechnology (CAB), Zhejiang University, Hangzhou 310058, China

Deadline for manuscript submissions:

20 January 2025

Message from the Guest Editors

Dear Colleagues,

This new Special Issue on the "Genetics and Genomics of Rapeseed Breeding" in the open access journal *Genes* focuses principally on the genetics and genomics of rapeseed. On the one hand, the aim is to mainly study the genetics and variation of rapeseed, but also the function, structure, variation, transmission and expression of genes. On the other hand, research on genomics, functional genomics and bioinformatics is aimed at improving the nutritional quality, stress resistance and yield of rapeseed and even other oil crops. This topic has received considerable attention and praise from the industry and readers and we are pleased to invite researchers and scholars to actively submit articles.

Editor-in-Chief

Prof. Dr. Selvarangan Ponnazhagan

Department of Pathology, The University of Alabama at Birmingham, 1825 University Blvd, SHEL 814, Birmingham, AL 35294-2182, USA

Message from the Editor-in-Chief

Genes are central to our understanding of biology, and modern advances such as genomics and genome editing have maintained genetics as a vibrant, diverse and fastmoving field. There is a need for good quality, open access journals in this area, and the *Genes* team aims to provide expert manuscript handling, serious peer review, and rapid publication across the whole discipline of genetics. Starting in 2010, the journal is now well established and recognised.

Why not consider *Genes* for your next genetics paper?

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

Journal Rank: JCR - Q2 (Genetics and Heredity) / CiteScore - Q2 (Genetics (clinical))
