Deadline for manuscript
submissions:

31 July 2024

Message from the Guest Editor

Dear Colleagues,

Following the recent advances in molecular genetics and high-throughput sequencing technologies, continuous and rapid progress has revealed the complex and varied genomic characteristics and genetics of plants. In the recent past, diverse omics technologies such as genomics, transcriptomics, epigenomics, proteomics, and metabolomics, have developed rapidly, providing powerful tools for the comprehensive study of plant nuclear, mitochondrial, and chloroplast genomes and their dynamics. These studies provide valuable insights into the underlying genetic mechanisms driving the complex traits of plants, helping us transform and use plant resources more efficiently. In this Special Issue, we aim to focus on the applications of cutting-edge technologies in the genetic and genomic studies of plant species that are related to scientific questions of wide concern. Studies including high-throughput sequencing data analysis and experimental validation analysis on the nuclear and organelle genomes are welcome. Both theoretical and empirical contributions will be considered.

Dr. Mingcheng Wang

Message from the Editor-in-Chief

Genes are central to our understanding of biology, and modern advances such as genomics and genome editing have maintained genetics as a vibrant, diverse and fastmoving field. There is a need for good quality, open access journals in this area, and the *Genes* team aims to provide expert manuscript handling, serious peer review, and rapid publication across the whole discipline of genetics. Starting in 2010, the journal is now well established and recognised.

Why not consider *Genes* for your next genetics paper?

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

Journal Rank: JCR - Q2 (*Genetics & Heredity*) / CiteScore - Q2 (*Genetics*)
