Advances in Evolution of Plant Organelle Genome

Guest Editor:

Prof. Dr. Zhiqiang Wu

Guangdong Laboratory for
Lingnan Modern Agriculture,
Genome Analysis Laboratory of
the Ministry of Agriculture,
Agricultural Genomics Institute at
Shenzhen, Chinese Academy of
Agricultural Sciences, Shenzhen
518120, China

Deadline for manuscript
submissions:

closed (25 June 2023)

Message from the Guest Editor

Dear Colleagues,

In this Special Issue, we aim to focus on the evolution of the plant organelle genome, including chloroplast and mitochondria. Our goal is to include research on organelle genome variations, transfer between organelle genomes, and organelle genome mutations, all of which will help us to develop a deeper understanding of the plant organelle genome.

Studies including genomic dry data and experimental wet lab data on the organelle genome are all welcomed. Research on morphological characters, evolutionary variations within and among populations, functional variations, connections among organelle genomes, and other related topics is invited.

Message from the Editor-in-Chief

Genes are central to our understanding of biology, and modern advances such as genomics and genome editing have maintained genetics as a vibrant, diverse and fastmoving field. There is a need for good quality, open access journals in this area, and the *Genes* team aims to provide expert manuscript handling, serious peer review, and rapid publication across the whole discipline of genetics. Starting in 2010, the journal is now well established and recognised.

Why not consider *Genes* for your next genetics paper?

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

Journal Rank: JCR - Q2 (*Genetics & Heredity*) / CiteScore - Q2 (*Genetics*)
