Statistical Genetics

Guest Editors:

Dr. Arthur Berg
Department of Public Health Sciences, Division of Biostatistics & Bioinformatics, Penn State College of Medicine, Hershey, PA 17033, USA

Prof. Dr. Rongling Wu
Penn State College of Medicine, Hershey, PA 17033, USA

Dr. Dajiang Liu
Penn State College of Medicine, Hershey, PA 17033, USA

Deadline for manuscript submissions:
closed (20 April 2021)

Message from the Guest Editors

A team of statistical genetics researchers at Penn State are putting together this Special Issue titled "Statistical Genetics". Statistical genetics is a rich interdisciplinary field that mixes together various aspects of genomics, quantitative genetics, computational sciences, bioinformatics, and statistics, and the editors are excited to promote this topic in *Genes* (2019 Impact Factor: 3.331) with this Special Issue.

This Special Issue welcomes any contributions to the field of statistical genetics or computational genomics, and we hope you will consider contributing. We are committed to fast responses from the editors. Feel free to reach out to any of the editors directly, or you can also contact the editors through a dedicated email address —genes.statistical.genetics@gmail.com—that has been set up to facilitate communication for this Special Issue.

We thank you very much for supporting this Special Issue, and we look forward to your submissions.

Special Issue

Editor-in-Chief

Prof. Dr. Selvarangan Ponnazhagan
Department of Pathology, The University of Alabama at Birmingham, 1825 University Blvd, SHEL 814, Birmingham, AL 35294-2182, USA

Message from the Editor-in-Chief

Genes are central to our understanding of biology, and modern advances such as genomics and genome editing have maintained genetics as a vibrant, diverse and fastmoving field. There is a need for good quality, open access journals in this area, and the *Genes* team aims to provide expert manuscript handling, serious peer review, and rapid publication across the whole discipline of genetics. Starting in 2010, the journal is now well established and recognised.

Why not consider *Genes* for your next genetics paper?

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.
Journal Rank: JCR - Q2 (*Genetics and Heredity*) / CiteScore - Q2 (*Genetics (clinical)*)
