submissions:

closed (30 July 2021)

Message from the Guest Editors

Dear Colleagues,

The aim of this Special Issue is to collect reviews and original research articles that advance our understanding of the mechanisms responsible for centromere assembly and dysfunction. We welcome author contributions highlighting novel findings on the assembly of the centromere, its (epi)genetic regulation, the molecular mechanisms operating at the centromere, and causes of centrosome dysfunction/malfunction associated with chromosome stability and their roles in human diseases. Centromeres are unique chromosome loci characterized by the binding of a special histone H3 variant known as CENP-A in vertebrates, Cse4 in *Saccharomyces cerevisiae*, Cid in *Drosophila melanogaster*, and HCP-3 in *Caenorhabditis elegans*. Here, the kinetochore complex adheres and sister chromatids are held together ensuring the faithful segregation of mitosis and meiosis. Hence, the correct assembly (protein composition, (epi)genetic background, integrity, localization, topology, and regulation) of the centromere is essential for the maintenance of chromosome (genome) stability.

Message from the Editor-in-Chief

Genes are central to our understanding of biology, and modern advances such as genomics and genome editing have maintained genetics as a vibrant, diverse and fastmoving field. There is a need for good quality, open access journals in this area, and the *Genes* team aims to provide expert manuscript handling, serious peer review, and rapid publication across the whole discipline of genetics. Starting in 2010, the journal is now well established and recognised.

Why not consider *Genes* for your next genetics paper?

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

Journal Rank: JCR - Q2 (*Genetics and Heredity*) / CiteScore - Q2 (*Genetics (clinical)*)
