## Genetic Research of Sex Determination

Guest Editor:

**Dr. Abdelhafid I. Bendahmane**

Universite Paris-Sud XI, INRA,  
Orsay, France

Deadline for manuscript  
submissions:

**closed (20 July 2021)**

### Message from the Guest Editor

How the gender of a flower or plant is determined is an important question in plant developmental biology. Understanding this process also has practical applications, as the gender of a flower or plant often limits how the plant is bred and cultivated.

The goal of this Special Issue is to highlight, through a standard peer-reviewed process, research and review papers focusing on sex determination or sex stability in different model species. The paper could describe the molecular mechanisms controlling the development of unisexual flowers or evolutionary aspects of sex determination in general.

## Editor-in-Chief

**Prof. Dr. Selvarangan  
Ponnazhagan**

Experimental Cancer  
Therapeutics, The University of  
Alabama at Birmingham, 1825  
University Blvd., SHEL 814,  
Birmingham, AL 35294-2182, USA

## Message from the Editor-in-Chief

*Genes* is central to our understanding of biology, and modern advances such as genomics and genome editing have maintained genetics as a vibrant, diverse and fast-moving field. There is a need for good quality, open access journals in this area, and the *Genes* team aims to provide expert manuscript handling, serious peer review, and rapid publication across the whole discipline of genetics. Starting in 2010, the journal is now well established and recognised. Why not consider *Genes* for your next genetics paper?

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

**Journal Rank:** JCR - Q2 (Genetics and Heredity) / CiteScore - Q2 (Genetics (clinical))
